Climate-controlled wine cabinets for residential and professional use

www.vinoracking.com

Wine preservation with Vinobox

Vinobox develops climate-controlled wine cabinets for both residential and professional users. The Spanish brand offers formats ranging from very compact units to high-capacity cabinets, with one or two temperature zones and both freestanding and built-in solutions.

The selection presented by VinoRacking.com focuses on controlled temperature, protection against vibration and UV exposure, optimized ventilation and wooden shelving designed to keep wine in appropriate storage conditions.

DESIGN

Distinctive formats and integration

From 7 to 300 bottles, designed for atypical spaces and contemporary interiors.

PRO

Simple and freestanding

A functional range for home users, hospitality, restaurants and professional applications.

GRAND CRU

Built-in versatility

One- or two-zone models, built-in or freestanding, with wooden shelves on rails.

Brand highlights

3 YEARS

Manufacturer warranty stated for the range.

100 %

Functional and visual inspection of manufactured units.

CE

Model approval and factory quality monitoring.

R600a

Refrigerant used in documented models; follow the safety instructions.

About the specifications

Stated capacities are nominal and based on 750 ml Bordeaux bottles according to their arrangement. Specifications may vary by product version. This catalogue combines information from VinoRacking.com, Vinobox.es, the 2024 manufacturer catalogue and the supplied instruction manuals. The manual for each appliance remains the reference for installation and safety.

Power supply for the documented models: 220-240 V / 50 Hz. Installation and ventilation must follow the corresponding manual.
